- A. population health.
 - *B. social determinants of health.
 - C. behavioral determinants of health.
 - D. epidemiology.

Answer: B – Social determinants of health is defined as the conditions in which people are born, grow, live, learn, work, worship, and age that affect an individual's health and quality of life.

6. Healthy People 2030 social determinant of health goal is to: create social, physical, and economic environments that promote the attainment of full health potential and well-being for all.
- *A. True
 - B. False

Answer: A – Healthy People 2030 has one goal focusing on social determinants of health that strives to create an environment that support an individual attaining their full potential for health and wellbeing.

7. Differences in morbidity and mortality data, disease burden, and other adverse conditions that exist among different populations is:
- A. health equity.
 - *B. health status disparity.
 - C. health status outcomes.
 - D. health status equity.

Answer: B – A disparity is a gap or discrepancy that exists within or between populations.

8. Health disparities are preventable.
- *A. True
 - B. False

Answer: A – Health disparities are preventable by intervening to improve the determinants of health.

9. Social determinant of health domains:
- A. Economic stability.
 - B. Healthcare access and quality.
 - C. Social and community context.
 - *D. All of the above.

Answer: D – Social determinants of health consist of economic stability, healthcare access and quality, and social and community context.

10. Social determinants of health can be both health protective and contribute to morbidity and mortality.
- *A. True
 - B. False

Answer: A – Social determinants of health at their best can be protective and at their worst can be harmful.
