Answer Key

Test name: Chapter 02

1) TRUE

The law consists of rules of conduct established by the government of a society to maintain harmony, stability, and justice. Ideally these should be balanced equally at all times. More often than not, however, "real life" is not harmonious, and justice must be sacrificed for harmony and stability.

2) FALSE

The law should be viewed as a delicate balancing act between the competing interests and rights of different groups of people. Further, the limitations and biases of judges, legislators, and the prosecutors require trade-offs and compromises to an already complex legal system.

3) FALSE

On the contrary, trade-offs routinely occur within the legal system. One person is allowed to go free, while another is imprisoned, fined, and forced to forfeit his property. One corporation's contracts are upheld, while another's are struck down.

4) TRUE

Because words are often ambiguous, the language of the law can become a hindrance, rather than a help in the execution of the law.

5) FALSE

From Chase's perspective, words versus interpretation is a particular brand of duality, and is neither a strength nor a weakness, but merely how the law works.

6) TRUE

The Uncertainty Principle was one of the linchpins of the economics theory of John Maynard Keynes. Keynes held that intent and results almost never coincide, and when they do, it is generally a matter of luck, nothing more.

7) FALSE

The first constitution of the United States was the Articles of Confederation—not the current Constitution. The Articles of Confederation were created to hold together a fragile coalition of states, each of which was determined to maintain its own independent existence. One of the main weaknesses of the Articles was the inability of Congress to impose taxes or tariffs.

8) FALSE

The principle of the separation of powers in the U.S. Constitution set up the three branches of the national government—the executive branch, the legislative branch, and the judicial branch. The principle of checks and balances allows each branch to share in the power of the other two branches.

9) TRUE

Article III gives judicial power to the U.S. Supreme Court and other courts established by Congress.

10) FALSE

Business Law with UCC Applications Edition 16 by Sukys

James Madison and other delegates to the Philadelphia convention in the late 1700s believed that Congress should have no power to enforce, eliminate, or modify rights except those that were expressly listed. However, some delegates warned that if some rights were listed, it would give the impression that those were the only rights that mattered. In the end the Bill of Rights, especially those regarding religion, was incorporated as a political compromise.

11) FALSE

An executive order is a device by which the president (and state governors) can act on their own without having to resort to the somewhat cumbersome process of going through Congress (or in the case of the governor the state legislature).

12) FALSE

The practice of writing and issuing an executive order is risky because the president (and the governor) must be careful not to violate the separation of powers principle upon which the stability of government depends.

13) TRUE

Technically, a proclamation is an executive order that addresses the public at large, while an order is one that is mandatory directive aimed at a subdivision within the executive branch.

14) FALSE

That is the definition of an executive order, not a memorandum. A memorandum is simply a suggestion issued by the president to an area of the executive branch, indicating how he would prefer that area to use its power. Executive Orders are generally risky because the president must be careful not to violate the separation of powers principle upon which the stability of federal government depends. The process is further complicated by the fact that executive orders actually have a variety of names, such as proclamations, orders, and memoranda.

15) TRUE

For example, all federal statutes are gathered in the United States Code (USC).

16) FALSE

The most significant development in uniform state legislation has been the Uniform Commercial Code (UCC). The UCC is a unified set of statutes designed to govern almost all commercial transactions.

17) TRUE

The term common law comes from the attempts of early English kings to establish a body of law that all the courts in the kingdom would hold in common. At that time, judges in towns and villages had instructions to settle all disputes in as consistent a manner as possible. The judges maintained this consistency by relying on previous legal decisions whenever they faced a similar set of circumstances.

18) TRUE

Business Law with UCC Applications Edition 16 by Sukys

Stare decisis is Latin for "let the decision stand." The phrase is derived from the common law, and comes from the process of judges recording and sharing their decisions with other judges. *Stare decisis* is the process of relying on previously recorded legal decisions, called precedents.

19) FALSE

Statutory interpretation is the process by which courts analyze those aspects of a statute that are unclear or ambiguous or that were not anticipated at the time the legislature passed the statute. A court cannot interpret a statute unless it is faced with a case involving that statute.

20) TRUE

Under the Administrative Procedures Act (APA), any administrative agency planning new regulations must notify the affected parties in the Federal Register and hold hearings to allow those parties to express their views. The APA also allows the courts to review agency decisions and rulings.

21) C

Often, the law is a balance between competing interests and rights. When people sue in court, for example, one party wins and one loses. In a criminal trial, one person is acquitted of a crime and allowed to go free, while another person is convicted and sent to prison.

22) A

According to Professor Anthony Chase in his study *Law and History: The Evolution of the American Legal System*, one of the most obvious dualities in the law is the balance between the spirit and the letter of the law. Generally, a person who follows the spirit of the law has found its actual intent, while one who is tied to the letter of the law has missed its true meaning.

23) D

Article IV of the U.S. Constitution provides for extradition of those accused of crimes in other states (found in Table 2-1 "Articles of the U.S. Constitution.").

24) C

Although there are many important amendments, what is widely recognized as the single most important amendment outside of the Bill of Rights is the 14th Amendment that guarantees due process and the equal protection of the law to all people. Since its inception in 1868, the courts have decided the 14th amendment means that the Bill of Rights must be enforced by the states as well as by the national government. States may expand rights, but they cannot limit or eliminate them.

25) C

Business Law with UCC Applications Edition 16 by Sukys

An executive order is a device by which the president (and state governors) can act on their own without having to resort to the somewhat cumbersome process of going through Congress (or in the case of the governor the state legislature). The practice of writing and issuing an executive order is risky because the president (and the governor) must be careful not to violate the separation of powers principle upon which the stability of government depends. The process is further complicated by the fact that executive orders actually have a variety of names, such as proclamations, orders, and memoranda.

26) D

Preemption is the process by which the courts decide that a federal statute must take precedence over a state statute.

27) D

The First Amendment to the U.S. Constitution contains some of the most important rights in the Bill of Rights. These include freedom of the press, freedom of speech, freedom of assembly, and freedom of religion.

28) A

In his study *Law and History: The Evolution of the American Legal System*, author Anthony Chase explains that in addition to duality in the law between the spirit and letter of the law and words versus interpretation, duality in the law exists between abstract principles and concrete situations.

29) D

A basic principle of constitutional law is that the U.S. Constitution is the supreme law of the land. This principle of constitutional supremacy means that all other laws must be in line with constitutional principles. If a law somehow conflicts with the Constitution, that law is said to be unconstitutional. If it does not conflict, it will be upheld by the court as constitutional.

30) A

In general, codes are subdivided into titles, which are groupings of statutes that deal with a particular area of the law.

31) B

The most significant development in uniform state legislation has been the Uniform Commercial Code (UCC). The UCC is a unified set of statutes designed to govern almost all commercial transactions.

32) C

The advent of the information age has sparked the need for specific cyber-law statutes that address the problems associated with cyber-commerce. The Uniform Law Commission (ULC) has responded to this challenge by creating the Uniform Computer Information Transactions Act (UCITA), which deals with cyber-contracts that involve the sale or licensing of digital information, and the Uniform Electronic Transactions Act (UETA), which points out those principles that should be used in every state to make certain that cyber-contracts are enforceable.

33) D

Business Law with UCC Applications Edition 16 by Sukys

The term common law comes from the attempts of early English kings to establish a body of law that all the courts in the kingdom would hold in common. At that time, judges in towns and villages had instructions to settle all disputes in as consistent a manner as possible. The judges maintained this consistency by relying on previous legal decisions whenever they faced a similar set of circumstances.

34) A

Modern courts still apply the common law when there are no modern court decisions or statutes dealing with an issue in dispute. When other cases may help in the decision, but are factually different, they may rely on *stare decisis* to apply precedents to the case before them.

35) B

Whether a precedent is binding or persuasive is determined by the court's location. For instance, decisions made by the Florida Supreme Court would be binding in all Florida state courts, but persuasive in all other states' courts.

36) D

When courts are exercising their inherent power of judicial review, the issue is whether the statute or regulation in question is compatible with Constitutional precedent. If the two are compatible, no problem exists; however, if they are contradictory, the statute or regulation will be "struck down" as unconstitutional.

37) C

Courts are not free to interpret statutes without a lawsuit that challenges the particular statute. When analyzing a statute, courts look to a variety of sources, including the legislative history, why the old statute was replaced, and any binding precedent that interprets that statute.

38) B

The goal of the Regulatory Flexibility Act (RFA) is not to give special treatment to small organizations, but to make sure that they get equal or nearly equal treatment in the marketplace. The RFA places an obligation on federal agencies to evaluate the effect that new regulations will have on these small institutions. The objective of this procedure is to make certain that the agencies do their best to protect small entities by keeping the negative effects produced by new regulations and orders to a minimum.

39) C

Because the U.S. Constitution is the supreme law of the land, any regulation or statute that is contrary to it must be held unconstitutional. In this case, because the regulation treats men and women differently, it would be held unconstitutional because it violates the equal protection clause of the 14th Amendment.

40) A

Business Law with UCC Applications Edition 16 by Sukys

The Federal Register is a publication that produces a daily compilation of new regulations issued by federal administrative agencies. The Federal Register operates within the National Archives and Records Administration under the authority of the Office of the Federal Register.

41) Essay

According to Professor Anthony Chase, one of the most obvious dualities in the law is the balance between the spirit and the letter of the law. Generally, a person who follows the spirit of the law has found its actual intent, while one who is tied to the letter of the law has missed its true meaning. In this case, Stanley seems to have complied with the letter of the law, but not the spirit of the law, missing the true meaning of the prohibition of bribery which ensures all citizens are treated equally.

42) Essay

The administration should analyze if this decision of the state comes with the intent of taking extra precautions for public safety. Have accidents occurred in the past? Notwithstanding, state statutes can be preempted by federal statutes in areas that are traditionally that of the federal government.

43) Essay

The principle of supremacy—the Commerce Clause in this case—allows federal regulations enacted under Constitutional authority to be superior to state law. The airline wins.

44) Essay

The United States Supreme Court can use the preemption doctrine to strike down this Massachusetts law. Preemption is the process by which the courts decide that a federal statute must take precedence over a state statute. The courts can preempt a state statute that has entered an area of the law that is traditionally an area that the federal government handles, such as national security or immigration.

45) Essay

State statutes can be preempted by federal statutes when they conflict with the objectives of federal legislation. The courts will preempt a state statute that has entered an area of the law that is exclusively an area belonging to the federal government. Since clean air regulation is not one of those areas, a state may have more stringent requirements for air pollution than the federal government, as long as the state statute is not in conflict with the federal Clean Air Act.

46) Essay

The prosecutor was wrong. Pierce's argument was correct in that the Fourteenth Amendment to the U.S. Constitution extends the protections of the Bill of Rights to state governments.

47) Essay

Matrix Corp. will lose because the Seventh Amendment to the U.S. Constitution only guarantees trials in common law cases, not for administrative agency actions.

48) Essay

Business Law with UCC Applications Edition 16 by Sukys

Two core theories have been proposed concerning the nature of presidential power: (1) inherent executive power and (2) delegated executive power. The core theory of inherent executive power, which is sometimes referred to as the stewardship theory, was first promoted by Alexander Hamilton, who simply looked at the wording of the Articles I and II and concluded that the authority of the president was not limited to the content of the article but, instead, included anything that any other national leader could do. In contrast, the core theory of delegated powers was promoted by William Howard Taft, who refused to believe that the chief executive held any “undefined residuum” of authority. Instead, Taft firmly believed that the president could not issue an executive order absent constitutional or congressional authority to do so.

49) Essay

The judge and the jury will arrive at a decision using common law—a body of previously recorded legal decisions made by the courts in specific cases. The process of relying on common law is known as *stare decisis*. The court is likely to use a precedent in using the principle of *stare decisis*. A precedent is a model case that a court can follow when facing a similar situation.

50) Essay

The U.S. Supreme Court has outlined a series of questions that judges should ask as they contemplate whether to overturn a precedent. These questions include the following:

1. Did the Court make a serious Constitutional error in the earlier decision and, if so, what was the nature of the error?
2. Was the Court’s reasoning in the earlier decision well-thought-out and well-structured, or was it fundamentally flawed?
3. Was the earlier decision applied in a consistent and predictable manner, or was its application erratic and inconsistent?
4. Was the earlier decision compatible or incompatible with other cases?
5. Will overturning the earlier decision upset the planning of those who relied on its continued existence, or will retaining the error cause even more serious consequences?

According to the Court, only if judges can answer those questions satisfactorily should they consider overturning an established precedent.
