64. Describe the similarities and differences between using Save and Save As to save a new file and an existing file.

ANSWER: Save and Save As work in the same way when you first save a file. In both cases, a Save As dialog box opens so you can select the drive and folder where you want to save the file and you can enter a filename for the new file.

If you open, modify, and then save an existing file, Save will save the file under the same name on the same drive and in the same folder. Save As, on the other hand, will open a Save As dialog box, and you have the option of saving the file under a new filename, in a different folder, on a different drive, or by using any combination of these options.

POINTS: 1

REFERENCES: Open, Edit, and Save Files
Windows 34

LEARNING OBJECTIVES: BESK.OFIN.16.254 - Save a file

TOPICS: Critical Thinking

65. What does it mean to restore a file and how do you do it?

ANSWER: When you delete a file or folder from the hard drive, it is placed in the Recycle Bin on the desktop. The contents of the Recycle Bin remain there until the Recycle Bin is emptied. If you need a file that you have deleted, you can restore it, which means that it leaves the Recycle Bin and is placed in its original location. To restore a file or folder, you double-click the Recycle Bin to open it. When you see the file or folder you wish to restore, select it, and then choose Restore the selected items button in the Restore group on the Recycle Bin Tools Manage tab. It is important to note that items deleted from a removable drive cannot be restored.

POINTS: 1

REFERENCES: Delete and Restore Files
Windows 42

LEARNING OBJECTIVES: BESK.OFIN.16.382 - Restore a file

TOPICS: Critical Thinking

66. Explain how you can search for a lost file on your computer and limit retrieval to only files on your computer.

ANSWER: First click in the search box on the taskbar and then type your search criteria. When the Search menu opens with possible matches, click My Stuff near the bottom of the menu. This will limit the search to files and folders in your storage locations on the current device.
