Correct Answer : C

31 : If the interest rate is 5%, the value of \$1,000 at the end of 10 years is

A : \$1,505.

B : \$1,628.89.

C : \$10,000.

D : \$57,665.04.

Correct Answer : B

MULTIPLE ANSWER

32 : Imagine you live in a country suffering from extreme inflation of 20% per month. The money you earn, every single molino, is worth a little less each week, so you and many others around you begin to use the currency of a more prosperous neighboring country, the dolingo. What is the term for this practice of adopting another country's currency?

A : Disintermediation

B : Dolingization

C : Dollarization

D : Monetization

Correct Answer : D

FILL IN THE BLANK

33 : What is meant by the phrase "double coincidence of wants" in a barter economy?

Correct Answer : A barter economy is one in which people trade goods for goods because there is no generally accepted medium used for money. This means that, for any transaction to occur,

there must be a double coincidence of wants between the two parties. Person A must want what person B is offering in exchange, and person B must want what person A is offering in exchange; hence, a double coincidence of wants.

34 : What are some of the challenges of using a commodity money in society?

Correct Answer : A commodity money is when some consumable asset is used for money in a society. The primary challenge with this scenario is getting the amount of money right. Too much money, and the society will have to deal with the problem of inflation. Too little money, and the society may not be able to grow and thrive.

35 : Explain why it is that money received today has greater value than money received in the future.

Correct Answer : This idea is known as the time value of money. Money received today can be spent today, meaning that you can enjoy the benefits of consuming and using what you purchase with your money immediately. Money received in the future cannot be spent until the future, so the benefit of your purchases cannot be enjoyed until the future. People would prefer to consume today rather than in the future.
